Allure

Allure is designed for executive, organisational and decision-making environments. The executive chairs stand out for their soft lines and focus applied to the distribution of pressure to ensure optimal comfort during use. Regardless of the option you choose, swivel conference offer the same aesthetic and ergonomic features.

Another detail of Allure is its border trim around the perimeter of seat and backrest, highlighting the pure and elegant lines of the armchair. This gives the chair a handmade and warm aspect and allows the option for a two-tone seam border trim on request.
