

studio drive

Drive Screens

Comprise fabric covered, pinnable panels, with an aluminium surround frame – thickness is 29mm.

Drive screens are standard at 350mm above the floor, or can be from floor level. Other height settings can be specified.

Recommended maximum screen height is 1350mm.

Screens can have clear acrylic panels fitted.

The same screens can be used with Studio style desks, by fixing directly to desktops.

Colours

Finishes can be selected at our showrooms:

- Powdercoat colour
- Fabric, including environmentally certified
- Laminates including E0

Accessories – Drive and Studio

Desk-mounted shelf in laminate or steel, to 1200mm long, with nickel plated hoops.
Desk-mounted Accessory Rail with paper trays.
Power (data) module at desktop.
Under desk cable baskets, single or double tier.
Separate modesty panel in metal, acrylic or laminate.
Low mobile pedestal, single file drawer, in metal or laminate.

Sustainability

Drive and Studio desk systems incorporate sustainable design principles - all materials and processes have been selected for their reduced environmental impact - specifications include low-emission, GECA-certified E1 and E0 board from selected suppliers.

Our Own Environment

Our ISO9001 Quality and ISO14001 Environmental Management Systems cover every aspect of our operations, from product design right through to delivery and installation, and beyond, backed by our 10-year warranty.

Our Quality and Environmental policies are available at www.workspace.com.au, or in our booklet: 'Making your workspace a greenspace'.

workspace

Drive

Frame mounted screens are unaffected by the desktop height setting.

Cables for power and data are concealable within Drive legs.

Drive Leg frames may be used to support screen-hung worktops.

Both systems suit stand alone desks or multiple workstations, including 120 degree pods.

Both are height adjustable, and strong – end frames are linked by steel beams.

Both feature environmentally responsible design using recyclable steel, and certified low-emission worktops.

Studio

Planning for efficiency:

Our CAD planners will find the best solution for your systems furniture needs, and present them to you in clear, detailed 3D drawing form.

The transition between quotation and production is thus simplified, making for smooth, on-time delivery and installation.

Elegant splayed leg design for stability, with optional wider feet for larger tops.

Can be mobile with castors to 2 or 4 legs.

Drive screens can also be used with Studio legs.
