

Crowne Plaza Hotel Adelaide

Crowne Plaza Hotel

Crowne Plaza Adelaide -Features 308 luxurious and contemporary guest rooms and suites. It also includes public areas along with the Redsalt restaurant and business centre.

The Hotel also boasts many environmentally sustainable design initiatives throughout the complex.

Design

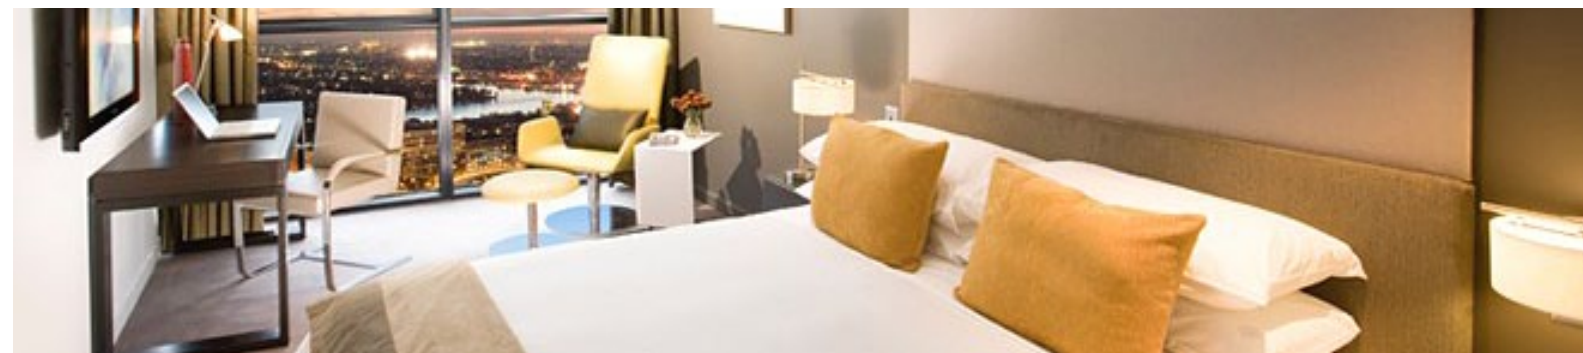

The Workspace design team comprises 6 experienced furniture designers who utilise the latest CAD software package (Pytha) which allows us to provide high level drawings and realistic render images.

This exciting program allows us to be responsive in implementing drawings /designs of product to meet your requirements. And with approval of drawings, production planning can immediately take place so that the accepted drawings can be rapidly turned into completed products.

Our electronic systems in conjunction with our Pytha package can optimise and procure raw materials assigned to your project. This integration significantly reduces lead-time and customer time.

multi room hospitality projects

Workspace experience has over the years provided many prominent commercial accommodation fit out projects throughout Australia from the following sectors.

- Hotels
- Apartments
- Motels
- Student accommodation
- Resorts

Our commitment and offering is vast, so whether your project has 5 rooms or 500, we are at your service to discuss your individual needs.

MANUFACTURERS OF QUALITY FURNITURE SINCE 1911

100 years

workspace

Facility

Our state of the art manufacturing facility and head office is located at Melrose Park (SA) where manufacturing and warehousing covers more than 13,000 square metres.

We currently employ over 150 personnel in the manufacturing trades, associated services and site installation teams Australia wide.

Our extensive showrooms and warehousing are located in Adelaide, Sydney, Melbourne and Canberra.

Manufacturing

Capabilities include the latest automated computer controlled machinery in timber/panel machining and woodworking processes.

We also have our own in-house veneer laying facility which enables us to apply a broad range of specialty veneer species from around the world, and a specialised polishing area that can process large volumes of furniture using 2 pack lacquer finishes and painted finishes.

Other capabilities include custom joinery production in solid timber, melamine and laminates, and upholstered products including tub chairs, sofas, chairs and bed heads, with resources for fabrication in steel and aluminium. We have extensive overseas contacts to assist in sourcing of products and materials.

Capacity - We have developed a diverse, high output manufacturing capacity, and to control this we have invested heavily in state of the art computer systems such that we can track your order through every manufacturing stage, while monitoring our total production process. All of this gives us the flexibility to maintain any size project and its unique requirements.

Logistics

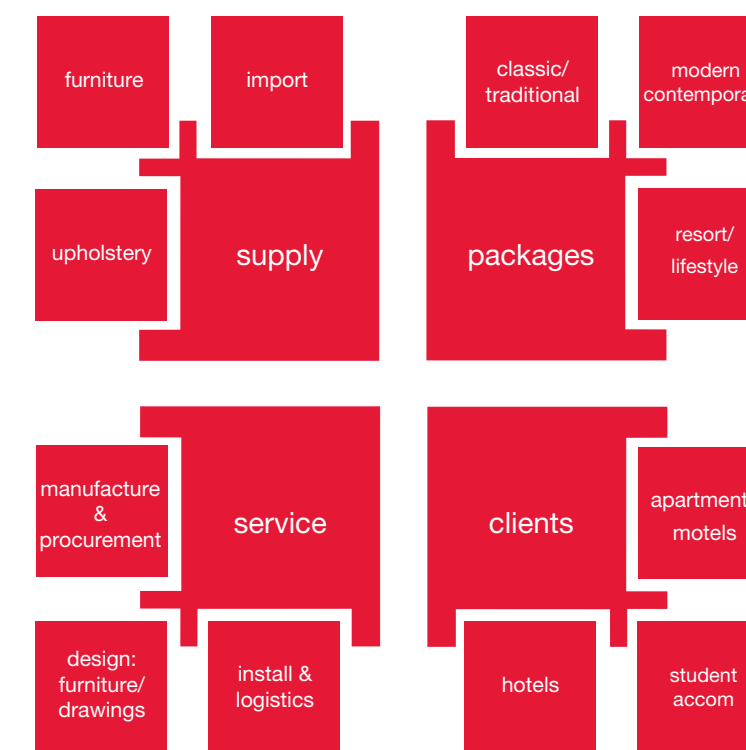

Workspace provides its own network of national freight services direct to your project.

We own our fleet of prime movers and trailers as well as rigid trucks.

We use electronic manifest systems at the factory to ensure that every detail of the product requirements of a project is identified and checked off prior to loading and dispatch.

Workspace drivers and removalists are trained in professional packing methods and use blankets to wrap your furniture to prevent any possible damage.

Furniture Packages

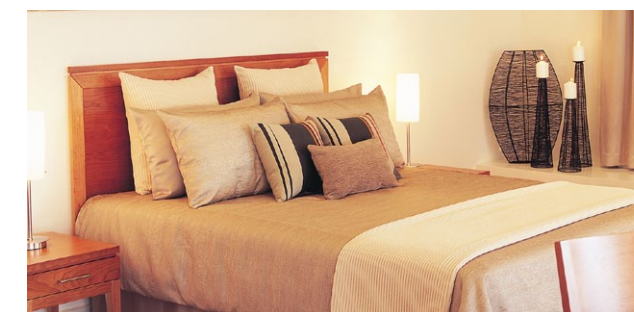

Packages

Resort - Retreat - Domain

We offer these furnishing packages that are designed to suit the location and feel of a wide variety of projects. Each package is defined by its individual style and coordinating finishes and colour palettes.

We are able to offer additional custom pieces that can be designed and manufactured to suit the above packages or to your individual project requirements.

Our ability to custom manufacture and design will also enable the flexibility to create your own individual style or we can consult with your appointed designer / architect to develop an understanding of your requirements.
