Make ————— Space ————— Work

## A-Series

A modern dining table and chairs set in a contemporary office environment. The table is made of light-colored wood with a simple, clean design. The chairs have a light wood frame and dark grey upholstered seats and backs. On the table, there are three small, metallic, copper-colored containers. In the background, there is a large, white, geometric sculpture on the left and a potted plant on the right. A clock is visible on the wall to the right.

# A-Series

Workspace's latest in-house designed timber family is simply named A-series after the A-frame form which is carried through from the table to the chairs.

The A-series was born of a requirement for a table which can be customised to any length requirement and matching chairs which will fit into many different environments and suit the widest range of users. A-Series seeks to return the solution of quality Australian design and craftsmanship and delivers an exceptional user experience. The A series has been designed in the "super-normal" aesthetic to sit unobtrusively in any environment without dominating the space. Using traditional joinery, high quality foams and symmetrical geometry, A-series delivers on style without sacrificing comfort, practicality, or quality.
