Track Workstations

Track's modular design allows for practical and efficient resolution of all kinds of workstation challenges/ Our highly experienced planning team will prepare detailed and precise planning solutions for you, in 3D CAD drawing format, to accompany any proposal for an office layout.

Soft wired power and data within the Track system is standard. Self switching GPO's and data sockets can be located either above the desk top, in a flush-mounted power box, or under the desk in single or two tier cable baskets. The supply cables and data cables can be neatly contained within a flexible umbilical conduit from the floor or ceiling, or within a power blade intergrated into any screen run.

Track Meeting Tables

You can apply the philosophy of coordinated design throughout any office by simply using Track for meeting tables as well as desks and workstations. It is perfect for larger tables, even boardroom tables - the floating top style and recessed frame rails and legs give plenty of room for more users without any hindrance.

Table tops can be specified in any finish including rich timber veneers, while the epoxy-coated steel frames can be specified in any colour. And if you need tables with mobility, special frames can be supplied with lockable castors.

During the development of the Track system, all materials and processes to be used in its manufacture have been assessed for their environmental sustainability. We source our flat panel materials, including low emission E0 and E1 rated products, from certified suppliers and we can supply many certified screen fabrics from Australian sources. Therefore, this system meets the stringent requirements of AFRDI Green and Blue Tick certification, which offers assurance to those seeking Green Star building accreditation. Furthermore, Track has undergone rigorous testing by AFRDI to AS4443 so you can be sure it has the strength and durability you are looking for.

The Track system is completely versatile allowing you to organise your space as you wish. The solution may be additional paper trays, an extra shelf, or a whole bookcase. Naturally, Track offers all of these.

Track Desk

As part of the Track system, our Track Desk is based on one principle - simplicity. With a powder-coated square steel frame, simple geometry is the key to the functionality of the Track Desk system.

Coupled with a range of worktop finishes and powder-coat options, the Track desk can blend into the background or make bold statements depending on the individual project requirement.

SPECIFICATIONS

Range:

Straight Desk
 Straight Desk with return (left or right)
 1-Piece corner desk
 2-Piece corner desk
 Meeting Table
 Workstation
 Technician height adjustable desk (up to 825mm)

Features:

Multiple configurations
 Multiple Finishes
 Stylish and functional accessories
 Compatible with Network screens and Fusion screens
 Strong durable construction
 50mmx50mm Welded steel frame
 Floating top look
 Levelling Glides

Leg Options:

Straight Leg
 Angled (15°) Leg
