A-Slim

A photograph of two modern, light-colored wooden chairs with dark grey upholstered seats and backs, positioned at a long wooden table. The chairs have a simple, functional design with a black metal crossbar. The setting is a bright, minimalist interior with a light-colored rug and a white wall.

A-Slim

A-Slim, a fresh evolution of the A-Series range, designed and manufactured exclusively by Workspace. A-Slim draws its design inspiration from the hugely successful A-Series range. Maintaining its straight lines, softened corners and visually striking white ash frame, A-Slim comprises a slim frame and seat profile, bolstered by the introduction of an aesthetically complementary and functional steel footrest. A-Slim provides the design without compromising on comfort and durability.

Visually appealing and at the heights of comfort, A-Slim delivers a smaller footprint than previous ranges. Crafted to incorporate continuous upholstery seating, and with the freedom for fabric options and timber stain colours at your specification. A-Slim is the ideal modern seating solution for commercial environments, and specialty areas including education, hospitality, aged care, health and domestic.
