# Forza

Forza. {Italian: Strength, Force}

Commercial spaces continue to evolve rapidly, and the lines separating traditional offices and communal spaces are becoming more obscure. This has resulted in a need for large, customisable tables to suit collaborative spaces and boardrooms. However, large tables often have too many legs and too many parts causing clutter, interfering with movement and breaking down the aesthetic.

Workspace presents Forza - a solid, stable and stunning table to suit any occasion or application. With sizes up to 4200mm long and 1800mm wide, Forza is the largest boardroom table on the market with just four legs! It is available in two height options - 720mm and 1050mm.

Forza was developed entirely in-house by Workspace's design team in the South Australian manufacturing facility. Forza is durable, fully recyclable and comes at an attractive price-point. Its modular design is so simple it can be transported flat-packed and installed within minutes. Available with timber or steel legs, with over fifty configuration options and a nearly unlimited selection of tops, Forza will fit into every corporate environment effortlessly.
