# HL3

HL3 Chair for workplaces, for study, entertainment and group venues and the contract sector. Featuring innovative construction solutions to achieve extremely high standards of resistance and duration combined with lightness and comfort.

The linear extension of the backrest below the seat makes it more elastic than a traditional structure allowing the seat to adapt to the movements and posture changes of the user. The unmistakably modern chair with a purity of form comes in different versions, complete with accessories and a wide range of materials, finishes and colours allowing you to customise each system to meet your exact project requirements.
