

In

workspace
commercial furniture

Designed by Gabriel Teixidó, 'In' has been developed expressly for Forma 5 Group in Sevilla, Spain, and is exclusive to Workspace in Australia. Comprising a module and a low table, the In range has a structure with four chromed metal legs, from where rods to fasten the bottom centre of the module or table add sophistication and robustness. For the table, 80cm diameter, you can opt for a timber veneer top in selected species, or a pre-finished top in several finishes. The width of the module combined with the curved back give comfort and an unrivalled sense of rest for a pleasant wait.
