# Lucky

Designed by Emilio Nanni

Lucky is a comfortable multi-purpose chair that is characterised by its formal lightness, essential design and exclusive two-colour finish. Qualified by a soft, flexible shape that adapts to the body well and follows its movements, the single-body structure in polypropylene has a differentiated surface with an anti-slip matt finish on the seat and a polished finish on the outside.

A sophisticated but at the same time functional solution that gives the chair a sophisticated, fresh image that is accentuated by painstaking colour matches.
