

Max

workspace
commercial furniture

Maximum design, maximum comfort, maximum functionality, maximum value.

Max chair is the beautifully designed, well-crafted and sophisticated all-rounder of the seating world. This versatile chair boasts a sturdy steel frame that shoulders the ergonomic polypropylene seat. The mesh back provides maximum comfort and breathability while the back rest frame provides just the right amount of flexibility to enhance the seating experience and highlight the strength and quality of this fantastic piece of furniture.

The Max chair is so versatile that there is hardly a seating requirement that this chair would not be a suitable solution for. Max is right at home in the education and hospitality environments where large numbers of seats are required as well as linking and stacking functionality for secure arrangement and storage. Its clean lines and smooth polypropylene surfaces compliment health care environments where strength, durability and cleanliness are paramount. Most commercial settings would also be well complimented by the introduction of such a versatile chair that would be right at home in a break out space, meeting room or foyer.

**The Max chair features a male to female linking mechanism. The female side of one chair is place over the male side of the adjacent chair to make the connection.*
