Pivot

Even when taking time out, it is important that you can get into a comfortable position that works for you. The Pivot Chair, with its ultra wide seat, allows the user to find their optimal position no matter their size or shape.

In addition to the wide seat, there is the optional self-returning rotary base which allows 180 degree movement; or a sled base for situations where rotation isn't needed.

With Pivot, the design has been considered in every detail; from the one piece moulded seat to the chrome bases, in either slimline steel rod or central column with star base.
