Travel

Travel. {The process of making a journey. Movement, typically in a constant or predictable way.}

The Travel Workstation range by Workspace Commercial Furniture delivers the user an experience perfectly aligned to its meaning.

Practical, functional and aesthetically clean, Travel is the height adjustable workstation system that allows flexibility not only in its range of vertical movement but also in its application. Electric, winder and ratchet mechanism options support consistency of movement, whilst quality design and materials provide strength and rigidity to the frame. Providing a consistent look amongst the family, Travel ensures continuity to meet the requirements of all workplace environments.

Everything has been considered; cables are easily managed with cable trays or baskets, and different screen options can be specified with confidence. The intuitive interface allows for programable maximum and minimum heights, and offers two memory buttons giving the user complete control while remaining consistent with the larger workplace.

The intelligent collision detection system ensures the longevity of the workstation is preserved through its "detect and retreat" programming. When a collision occurs while raising or lowering, the desk stops immediately and reverses 50mm to prevent or reduce the likelihood of any damage.

Furthermore, the new Bluetooth function lets the user set reminders, track their minutes and adjust the height through their phone even while walking to their desk. The intuitive app is compatible with Apple and Android systems, and can be downloaded from the App Store.

Travel by Workspace is the ideal solution for delivering the perfect journey throughout every work environment.

SPECIFICATIONS

Range

- "Travel Electric" desk/workstation with Bluetooth function
- "Travel Manual" desk/workstation
- "Travel Tech Adjust" desk/workstation
- "Travel Meet" meeting table

Bluetooth

Use the Bluetooth function to set reminders and track. For Bluetooth function visit the Apple or Android App Store and search for "Sit Stand Desk". Download this app.

Notes

All straight desk options can be arranged in long banks.
 Tech Adjust desk or workstation has height adjustment in 20mm increments.
 Tech Adjust desk or workstation is available in straight or 90 degree options only.
 Travel X is available in straight option only.
 Travel Meet is available as a meeting table only.
 Travel Go comes without monitor arms, and only Arc Lite screen is allowed.
 All pods and back-to-back desks can share a common screen.
 Size constraints may require large tops to be supplied in two pieces.
 Wide range of veneers, laminates and pre-finished boards available on request.
 All cable trays GPOs and data points are fully compliant to Australian Standards.

Battery Power

Operate your Travel Electric desks and workstations on battery power when access to plug-in power is unavailable. Animate by OE Elsafe offers a great solution to make your Travel un-plugged, especially if your desk is on castors.
